10 YEAR ESSIX (CLEAR) RETAINER WARRANTY

When you complete orthodontic treatment, if you choose Essix (clear) retainers, we will provide you with 3D digital models. If you lose or break your Essix retainers, we will make one set per year after the braces are removed at no charge. For example, if your braces were removed February 10, 2022, we will make you a new set on February 10, 2023. We can use those digital models to make new Essix retainers for up to ten years from the date your braces are removed, unless your teeth shift, you lose or break the digital models, or you receive dental work which prevents a proper fit. The fee for a new Essix retainer is \$325 (\$650 for a set of two); this fee is subject to change.
